**QUAYLE ACTION**

This application is in condition for allowance except for the following formal matters:

1. The abstract of the disclosure does not state of the technical disclosure, it exceeds 150 words in length, and it is not in a single paragraph.
2. Figures 34, 38 and 39 contain a typographical error "Flg." instead of -- Fig. --
3. Figure 29 contains low quality font.
4. Figures 2A-B does not correlate with discloser. Specification only disclose of Figure 2.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Pertinent Art Cited***

The following US Patent Applications reveal the current state of the art:

Omura et al. (US 2001/0008984) teaches of a drug dispensing apparatus (fig.2) comprising a cassette (cassette 20) for containing drugs in an aligned state (drug 1, fig.1), a pushing unit (22) for pushing said drugs toward said rotor (fig.2), and a measuring unit (41 and 42) for measuring the present quantity of said drugs in said cassette (par.0091). Omura further teaches of sensing dispensing and receiving position by on and off switches of measuring unit (par.0094) and incrementing or decrementing count value stored in table (table 46) to accurately reflects the number of medicine contained in the cassette (20; par.0096).

Art Unit: 2857

However, Omura does not teach at least of a rotor disposed at one open end of said cassette, a drive mechanism for pivoting said rotor alternately between a dispensing position and a receiving position by operating a drive switch to dispense said drugs one by one, and wherein when said rotor is returned to the receiving position from the dispensing position, the present quantity  $N$  measured by the measuring unit is compared with the stock quantity  $N_0$  stored in said memory unit, wherein if the present quantity  $N$  is less than the stock quantity  $N_0$ , the present quantity  $N$  is stored in said memory unit as a stock quantity  $N_0$ , while if the present quantity  $N$  is same as the stock quantity  $N_0$ , it is informed that said drug has been forgotten to take out.

***Allowable Subject Matter***

Claims 8-14 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for the allowance of claim 1 is the inclusion of the limitation "wherein when said rotor is returned to the receiving position from the dispensing position, the present quantity  $N$  measured by the measuring unit is compared with the stock quantity  $N_0$  stored in said memory unit, wherein if the present quantity  $N$  is less than the stock quantity  $N_0$ , the present quantity  $N$  is stored in said memory unit as a stock quantity  $N_0$ , while if the present quantity  $N$  is same as the stock quantity  $N_0$ , it is informed that said drug has been forgotten to take out". The prior art of record, taken alone or in combination, fails to disclose or render obvious.

Claims 9-14 are allowed due to their dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
